

DCI/ICS-86-0982
23 December 1986

MEMORANDUM FOR: SCI Forum Members
FROM: Executive Secretary
SUBJECT: 12 January 1987 SCI Forum Meeting (U)

1. The following is the agenda for the next cited subject meeting scheduled for 1300 hours, 12 January 1987 in Room 6100, Department of Justice. (U)

AGENDA

- Approval of minutes of the 2 December 1986 meeting.
- Discussion for approval of content of NSA memo dated 28 November 1986 recommending one minor revision in each DCID, 1/7 and 1/19. Copies attached for review before the meeting.
- Discussion for approval of content of DIA memo dated 1 December 1986 calling for declassification of certain paragraphs in DCID 1/19. Copies attached for review beforehand.
- Product of joint NSA/OSD effort, revised language for paragraph 35. h., DCID 1/19 (contractor visits), presented for members approval.
- Presentation of DCIDs 1/7 and 1/19 for approval. (U)

2. DCID 1/7.

Reference is made to SECOM-D-135 dated 9 May 1986, which contained changes recommended and concurred in by CIA/DDO at that time and reconfirmed since our last meeting. Reissue of the DCID as unclassified was also proposed. To reiterate the proposed DCID 1/7 revisions, the following is set forth with new or revised portions underlined:

UNCLASSIFIED

- a. DCID 1/7 to be reissued as UNCLASSIFIED with the last two sentences of "Purpose" paragraph of Part 1 deleted.
- b. Paragraph 8. b., relative to ORCON.
 - No change to first tick.
 - Information bearing this marking may not be disseminated beyond the headquarters elements³ of the recipient organizations and may not be incorporated in whole or in part into other reports or briefings or used in taking investigative action without the advance permission of and under the conditions specified by the originator. No change to remainder of second tick; footnote 3 revision to be provided at the meeting.
- c. Paragraph 8.c., relative to NOCONTRACT.
 - Change the second sentence as follows: "This marking may be used only on intelligence which was provided by a source on the express or implied condition that it would not be made available to contractors; or which if disclosed to a contractor, would actually or potentially give him/her obligation to protect the information."

Subsequent to the last forum meeting, DIA and CIA members have reached agreement and concur in the language offered above.

- d. Paragraph 12. a., relative to release of Intelligence to Contractors and Consultants.
 - Change footnote 5 to read: "The term 'selected intelligence' excludes Foreign Service reports, SCI, and material bearing ORCON, NOCONTRACT, or PROPIN control markings. Foreign Service reports may be released only with the permission of the Department of State. Release of SCI is governed by agreements among Intelligence Community components. Release of intelligence material bearing ORCON, NOCONTRACT, or PROPIN markings is governed by paragraph 8 of this directive."
- e. Footnote 6, first two sentences to be changed to read: "Non-Intelligence Community components of the Executive Branch of government under contract to fulfill an intelligence support role may be treated as members of the Intelligence Community. In that event, release will be made only with the consent of the originator, will be solely for the specific service required by the contract, and will not include authority to disseminate intelligence further."
- f. References to the "DCI Security Committee" appear in paragraphs 11 and 13. In paragraph 11, it is now necessary to substitute the "DCI's Unauthorized Disclosures Analysis Center." In paragraph 13, replacement language will read the "Executive Secretary of the DCI's Sensitive Compartmented Information Forum." (U)

3. DCID 1/19.

Reference is made to SECOM-D-136 dated 9 May 1986, which was distributed to all members now represented in the SCI Forum. Written and verbal responses to that memo, including discussions in Forum meetings have resulted in resolution of the points raised in the memo. Other changes recommended and receiving verbal approval are as follows:

a. Definition of "Senior Intelligence Officer" to be added under "Definitions," paragraph 1. h. Senior Intelligence Officer (SIO)--The highest ranking military or civilian individual charged with direct foreign intelligence missions, functions, or responsibilities within a department, agency, component, command, or element of an Intelligence Community organization. When an SIO has been assigned responsibilities by this DCID or delegated authorities by an SOIC, the SIO is responsible for implementing the policies and procedures of this DCID.

b. Paragraph 17 (page 14 of draft), "VCRs and TV monitoring equipment" added to read..."Compromising Emanations Control Security (TEMPEST). All equipment used to transmit, handle, or process SCI electronically, including communications, word processing, automated data processing equipment, VCRs, and TV monitoring equipment, must satisfy the requirements of NCSC-4,"...remainder of paragraph remains unchanged.

c. Paragraph 47. b. (page 41 of draft) contains a reference to the "DCI Security Committee." This is to be revised to read the "DCI's Unauthorized Disclosures Analysis Center..."

d. Paragraph 48.d. (page 42 of draft) contains a reference to the "DCI Security Committee." This, too, will be revised to read the "DCI's Unauthorized Disclosures Analysis Center..."

e. Paragraph 49 (page 43 of draft), last line, identifies the "DCI Security Committee." Again, this will be changed to read "DCI's Unauthorized Disclosures Analysis Center." (U)

4. The Forum business appears to be closing in on two short term objectives, the publication of revised versions of DCID 1/7 and DCID 1/19, both inherited from SECOM. Success in these projects will present an encouraging start for CY 1987. On an informal note, D/CCISCMS and staff extend best wishes for a happy holiday season and a productive, successful year ahead. (U)

**MEMORANDUM FOR THE CHAIRMAN, COMMUNITY COUNTERINTELLIGENCE AND
SECURITY COUNTERMEASURES STAFF**

**SUBJECT: Draft Revisions of DCIDs 1/19 and 1/7 - INFORMATION
MEMORANDUM**

1. By Memorandum, dated 15 October 1986, I submitted a proposed language change to paragraph 35.h. (page 31) of DCID 1/19. Since that time, the Information Policy Organization at NSA has conducted a further review of the DCID 1/19 draft and requested that I surface the following additional recommended changes:

a. Paragraph 24. Portion Marking (page 17): Recommend the phrase: "that is transmitted outside the originating agency or department" be deleted from the first sentence. As currently worded, this guidance can be interpreted to mean that SCI documents remaining within an agency or department do not require portion marking. Our contention is that portion marking is an important information security practice, which is appropriate regardless of the intended destination of the SCI material. This is especially true the greater the sensitivity of the information being disseminated.

b. Paragraph 27.b. Photographic Media (page 21): For clarification purposes, recommend changing the title of this paragraph to: "Photographic Media and Video Tape" and make a corresponding change to the first sentence so as to read: "Photographic media (in roll, flat, or other form) and video tape containing SCI..." Likewise, the third sentence should also be modified to read: "Roll film and video tape shall include..."

2. With respect to DCID 1/7, we do not have the same concerns as raised by DIA with respect to the "NOCONTRACT" issue and concur in the draft revision previously submitted.

3. Any questions regarding this submission can be directed to my Management and Policy Staff on (301) 859-6350.

Subj: Comments on Draft DCID 1/19

Ref: DIA Memorandum C-8279/OS-4B, 18 Jun 86

1. OS-4 now concurs in the recommendation that total document control is required of facsimile materials transmitted via secure methods, excluding electrical messages.

2. The following paragraphs in the draft manual are marked CONFIDENTIAL, while the same information appears in the M 1 manual as UNCLASSIFIED. The M-1 manual was provided to the Committee that drafted the SCI manual. The classifications cited below are really not supportable.

SCI Manual

M-1 Manual

22	3-D
25.c	3-L.2
26.a	3-I
27.d	3-K.5
29.a(1)	3-M
33.b	3-Q
40.b(5)	10-B
41	10-R 8
